

Student Name (print): Rachel Ramsey

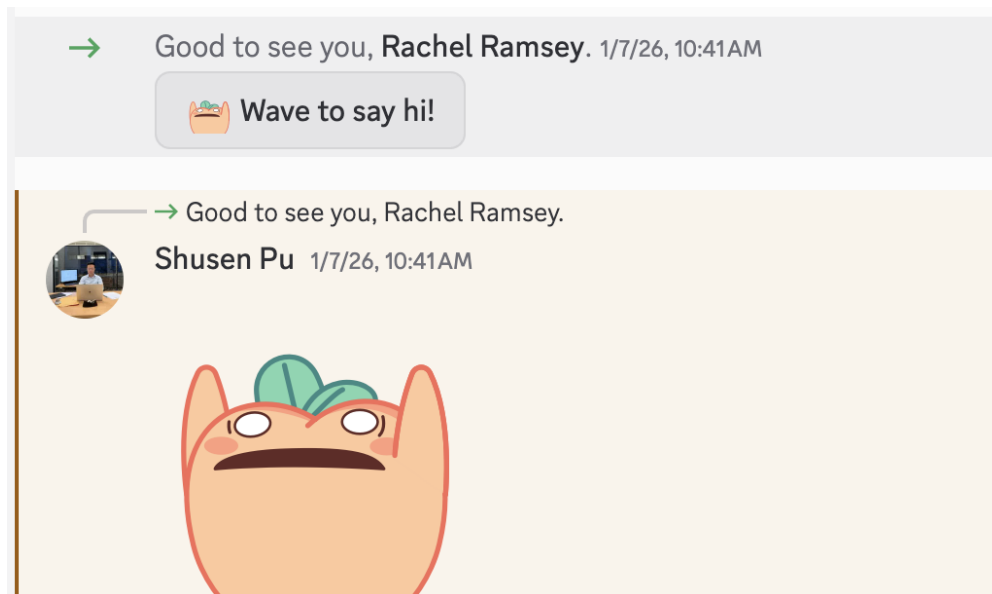

This assignment contains 2 pages and is due at **11:59 pm on Sunday**.

Question:	1	2	3	4	5	Total
Points:	2	2	2	5	5	16
Score:						

1. (2 points) **Introduce yourself and meet your classmates:** Please upload/insert a screenshot here.

2. (2 points) **Join the course Discord channel.** Please upload/insert a screenshot here.

3. (2 points) List a tentative topic or method that you're interested in exploring during this course. You have the flexibility to change it up until week 5.

Using machine learning techniques to predict occupational or industry employment in Florida's counties.

4. (5 points) Form a team with no more than 4 members. List your teammates' names in the homework. You can adjust your team anytime before week 5.

I am working by myself as of right now.

5. (5 points) Please review and study the following two methods for presenting your progress and research report:

1. Write your report on Overleaf. You can copy or download the template from: <https://www.overleaf.com/read/tgrddxgwrhst#ff33cc>.
2. Write your report on GitHub. The template is available here: https://github.com/capstone4ds/capstone4ds_template. You can find instructions for setting up the website on the same page.

Please indicate which method you will use for this course.

I will use GitHub.
